

## Laboratory and testing services

### Description:

Through our network we are able to offer a wide range of analyses in Agriculture, petroleum, chemical products, minerals, oils, food products, etc.

In Cameroon, we operate three cocoa and coffee laboratories and if necessary, extend to meet your needs.

We can control according to Cameroonian and international standards.

We have qualified and experienced employees.

If needed; you can outsource the management of your laboratory

We are approved by the Ministry of Commerce for the quality control of cocoa and coffee exports.

We also offer cocoa and coffee quality control training programs.

### Goals:

- Develop our laboratory services
- Meet customers' needs

### Target:

Government, National and International Organizations, Producers, Cooperatives, Exporters and Buyers.

### How: We possess

- Sampling instruments (probes of different sizes)
- Humidity measuring instruments
- Sealing equipment
- We can classify according to Cameroonian and international standards
- Experienced working team

### Benefits / Advantages:

- We are a neutral and independent Party for both the sampling and analysis
- Our certificates are accepted by international buyers

**Duration:** By mandate, everything depends on the volumes and analyzes required

**Pricing:** The prices take into account the mandate
