

Management of drying station

Description:

The management of drying stations, warehouse and stocks is a completely neutral and independent service, entrusted to an experienced third party.

Goals:

The quality control of equipment is financed by an external body and Certispec ensures the good management of the collective facilities of the Cooperatives by a neutral party, minimizing the internal and external conflicts concerning the inputs and outputs of the drying station.

- The Cooperative reimburses the body that has financed.
 - Inventory management permanently
 - Quality control
 - Detect anomalies and make necessary adjustments
-

Clients: Government, National and International Organizations, Cooperatives, Funding Organizations

How:

- Procedures are written by Certispec in agreement with the client
 - Control of quality and quantity inputs/outputs
 - Stakeholders management
 - Warehouse inventory management and custody
 - Detection of sources of non-quality / non-compliance
 - Periodic inventory
-

Benefits:

- Reduction of the cost and better management
 - We can inform buyers of the availability of products and give them an idea of the quality. The Cooperative discusses prices directly with the exporter / buyer.
 - Avoids conflicts of interest internally and externally
 - Quality improvement
 - Quality history
 - At the end of the project, the Cooperative becomes the owner of the equipment as per the leasing contract.
-

Duration:

We believe that this service could be funded on the basis of the leasing agreement (two or three cocoa campaign)

Rates depend on warehouse activities, where and contract duration
