

## SUPPORT FOR QUALITY AND QUANTITY AT THE BUYING AND EXPORT POINTS

### Description:

Controls at the origin of the buying points and at the export warehouses by neutral and independent parties specializing in quality control will serve to ensure product traceability and price to quality ratio equity (fair trade).

---

### Goals:

With our experience, we establish quality and quantity at the buying points and at the approved warehouses / buyers and sellers. Undertake quality and quantity control analyses and deliver reports and slips in order to:

- Maintain traceability,
  - Assess and improve overall product quality by avoiding coxing,
  - Ease transportation and good reception,
  - Assessing quality by origin
  - Allow Government to have clear documents in order to provide "Quality Bonus"
- 

**Target:** Government, National and International Organizations, Cooperatives, exporters and business operators in general.

---

### How:

- Traceability between the origin to export warehouses
  - Presence of a Quality and Quality Control Company at each point
  - Creation of a Coordination center
  - Real-time inventories accessible via the Internet
  - Creation of a transport sheet with destination, buyers, quality and weight
- 

### Benefits / Advantages:

- Fairer trade between Cooperatives and Exporters
- Avoid *coxing / coxeurs*
- Keep control of quality and quantity
- Avoid a buyer delivering products financed by an Exporter to another Exporter
- Better prices for the Cooperatives
- Quality improvement
- History on quality at cooperative and regional level (quality by origin)

### Duration / Pricing:

A 5 years duration is recommended.

Pricing is based on the number of locations and tonnage.
